“ A unique opportunity to get a 360 view of phage as a novel therapy for altering the microbiome. ”

ASSAF ORON, BIOMX

ATTENDEES

GEOGRAPHICAL BREAKDOWN:

SENIORITY BREAKDOWN:

“ I’m excited to join fellow pioneers that recognize bacteriophages and their lysins are critical therapeutics needed in the global armory of antibiotics before the post-antibiotic era is fully realized. ”

CARRIE-LYNN LANGLAIS FURR, AMPLIPHI BIOSCIENCES

“ Phage therapy is a long-promised technology whose time is now, and we finally have the advanced tools to make this promise a reality. At this summit, I’m looking forward to sharing ideas with pioneers and trailblazer in this exciting field. ”

YUG VARMA, PHI THERAPEUTICS

“ I’m excited to meet others in the ecosystem of companies in phage therapy – the field can only thrive through cooperation. ”

LORENZO CORSINI, PHAGOMED

“ The Bacteriophage Therapy Summit is an exciting conference that transformed me as a lay person into a highly stimulated researcher, for all the nature’s promise for our current problems. ”

WENDA GAO, ANTAGEN INSTITUTE FOR BIOMEDICAL RESEARCH

Why Get Involved with the 2nd Bacteriophage Therapy Summit 2020?

As the opportunity of tackling antibiotic resistant infections promised by phage therapy becomes a reality, the **Bacteriophage Therapy Summit** returns in 2020 to not only drive forward the translation of phage pharmacology into the clinic but stimulate discussion around next generation phage therapeutics that harness different modalities and how this science can be commercialized and delivered into the hands of physicians and patients in need.

The **Bacteriophage Therapy Summit** is a specifically dedicated scientific and networking forum for large pharma, innovative biotech and research institutes to capitalize on this re-emerging therapeutic class. Focused on overcoming the unique translational and drug development hurdles facing phage therapy, join your peers who are accelerating phage research back into the clinical mainstream.
